

FUEL DELIVERY ON DEMAND APPLICATION

SYNOPSIS

The Fuel Delivery on Demand application helps in the delivery of fuel depends on the user order and request. Due to the growth of vehicles, fuel consumption became more. In existing system, unfortunately, if vehicle stops due to lack of petrol, it will be very hard for the owner to push the vehicle to the nearest petrol pump. In the above method time and manual work is done by owners of the vehicle. For some aged people or medically ill people it will get even hard. In this case the proposed application can be used to deliver the fuel to those who need to refuel vehicles at any location or nearby location at any time. The Fuel Delivery On Demand Application helps the end user to select type of fuel required, order and get the fuel in the place they are standing, which makes the process easier for the user.

Admin can verify Fuel Station details. Fuel Station can add their branch information like address and google map geo location and kind of fuel provide. User can search by locality or station name and book the fuel on online app which can be delivered by delivery agents.
